

Frontend Developer Internship at Atri Labs

Assignment deadline: **February 18, 2023**

Assignment

In this assignment you will be creating a web page using Atri framework. To use Atri framework you just need to know basic CSS.

Please follow the steps below to complete this assignment:

1. Follow the [installation guide](#) to satisfy prerequisites and install Atri framework
2. Create your [first Atri app](#) to get a quick introduction to the framework.
3. Create a clone of [this website's home page](#).
 - a. We will not judge the responsiveness of your website. Please concentrate on desktop screen size only.
4. Upload your repository to GitHub (you can refer to [this video tutorial](#)).
5. Submit your repo link by filling [this Google Form](#).

Judging criteria

Almost everything you need to complete this assignment is included in this Google doc or linked here. We will judge you on how well you are at following items:

1. Following docs, tutorials and written guides
2. Troubleshooting any error yourself by finding relevant resources from the Internet

Others:

3. Alignment
4. Spacing and position
5. Typography
6. Minimal CSS
7. Using correct component
